GP[®] BKS-2603 Coating Resin

PRODUCT INFORMATION

INTRODUCTION

GP[®] BKS-2603 heat-reactive phenolic resin solution in ethanol and butanol is formulated to provide chemical resistance for protective coatings for rigid metallic substrates. Similar to GP[™] BLS-2700 coating resin, this product features better water compatibility than GP BKS-2600 coating resin.

APPLICATIONS

GP BKS-2603 resin is used primarily in applications such as linings for drums and pails, pipes, tanks and railcars.

CERTIFICATIONS

GP BKS-2603 coating resin is compliant with FDA 21 CFR Part 175 Indirect Food Additives: Adhesives and Components of Coatings per 175.105 as a component of an adhesive and 175.300 as a resinous and polymeric coating. It also complies with 177.1210 as a component in closures with sealing gaskets for food containers.

STORAGE AND HANDLING

GP BKS-2603 resin is packaged in drums and as a heat-reactive resin, has a limited shelf life. Extended storage at high temperatures should be avoided to prolong the useful life of the resin. It is suggested that the resin be stored at or below 50°F (10°C) in order to optimize storage life. Storage life is dependent on your product's formulation using GP BKS-2603 resin. This product should be stored and used in areas with good ventilation.

The proper personal protective equipment should be worn whenever GP BKS-2603 resin is used or handled. For safety and health information, please refer to the Safety Data Sheet for GP BKS-2603 resin available from Georgia-Pacific Chemicals.

TYPICAL PROPERTIES

Form	Solution in ethanol and butanol
Viscosity @ 25°C, cP (mPa*sec)	750 – 1500
Solids, wt. %	62 – 66
Specific Gravity @ 25°C	1.08 – 1.12
