

Georgia-Pacific

Chemicals

A Global Performance Chemicals Manufacturer and Marketer

A wholly owned subsidiary of Georgia-Pacific, Georgia-Pacific Chemicals products are used in a diverse range of industries. The product portfolio covers specialty and basic chemicals that are often custom-formulated and used in a wide variety of applications. Georgia-Pacific Chemicals creates long-term value by providing superior service and focused innovation to safely deliver actionable solutions to our customers.

Products and Services for Diverse Industries

Decades ago, the initial offerings of Georgia-Pacific Chemicals were quality resins and adhesives for the wood products industry. We now offer products to industries as diverse as auto manufacturing to agriculture. Our innovation now extends to new products and services beyond chemicals manufacturing.

Chemical Products

Three laboratories of chemists concentrate on developing innovative and unique products. A sample of product categories include:

Abrasive Resins	Curing Agents	Melamine-Urea-Formaldehyde
Adhesive/Binder Resins	Etherified Resins	Molding Compound Technology
Asphalt Emulsifiers & Modifiers	Formaldehyde Solutions & Concentrates	Resole and Novolac Phenol-Formaldehyde
Synthetic Carbon Resins	Epoxy Hardeners & Additives	Saturating Resins
Composite FRP Resins & Catalysts	Melamine-Formaldehyde	Urea-Formaldehyde

Markets

The diversity of industries that use products from Georgia-Pacific Chemicals is limitless. Currently they include:

Agriculture	Animal Feed	Asphalt	Ballistics	Adhesives/Sealants
Aerospace	Automotive	Coatings	Concrete	Decorative Lamination
Electronics	Filtration	Foundry	Roofing	Glass Mat
Insulation	Oil & Gas	Surfaces	Ventilation Systems	Wood Products

Services and Other Products

Georgia-Pacific Chemicals has developed equipment and technology to help our customers beyond the benefits they receive from our chemicals. The GP[®] Dynamic Microchamber helps wood product manufacturers measure formaldehyde emissions in their products to help them meet environmental standards. Our GP[®] Process Modeling technology monitors manufacturing processes to give manufacturers the ability to determine variations in those processes to improve performance. Another service allows us to track inventory at our customer's facilities to help assure our products are on-hand when needed. We also provide quality tolling services to other chemical manufacturers and distribution services for international chemical companies.

Koch Connection

In addition to the expertise and products of Georgia-Pacific Chemicals, as a member of the Koch family of companies, access is available to the expertise and products of our sister companies. We collaborate with these and other companies to optimize each company's strengths to develop products in new markets. For example, in the asphalt industry, this translates into synergistic resources of Invista and Flint Hills Resources. Other sister companies we work with include Molex and Guardian[®] Industries.

A Sample of How We Touch People's Lives

1. Wood
Adhesives for manufacturing plywood, etc.

3. Filters
Saturating resins for paint rollers and fillers

5. Coatings
Resins for Coating

7. Rocket Nozzles
High-temperature and fire-resistant chemicals for composites

2. Fertilizer
Precursors for nitrogen-based fertilizers

4. Shingles
Glass mat adhesives used in roofing

6. Asphalt
Asphalt additives for paving and roofing

8. Automobile Parts
Resins used in brakes and automotive panels

Quality and Reliability in Operations

Georgia-Pacific Chemicals has manufacturing operations in the United States, Chile and Argentina with technology collaborators in Europe and Asia. Customers tell us that the consistent quality of our products and reliability of our operations are key reasons to do business with Georgia-Pacific Chemicals. Other benefits include our many manufacturing assets, our national footprint with eight U.S. plants and a private tanker truck fleet dedicated to customer focus and safety.

R&D/Analytical Services

By listening to our customers and understanding their processes, we provide total solutions with long-term value that can help transform their businesses and assure our place as a preferred partner. We have experience with developing products that meet military specifications and products to help obtain FDA, USDA Biobased, Engineered Wood Association (APA) and LEED® certifications. Embracing innovation to spark new ideas and create new products, we utilize every available resource, including our in-house Analytical and Applications teams, to formulate practical solutions to business needs. We are problem-solvers and continually refine or replace our products through continual development, ensuring that our customers will derive value from our products today and into the future.

What We Believe

Georgia-Pacific Chemicals is focused on creating long-term value for our company, customers and other stakeholders. The underlying principles which guide our actions are defined as Market Based Management (MBM). MBM is based on integrity, compliance, customer focus, and creating value in areas where we can leverage comparative advantages in our knowledge, technologies, logistics and access to resources. These principles challenge us to achieve world-class excellence by constantly identifying and implementing new and better ways to manufacture products and support customer needs.

Why Georgia-Pacific Chemicals?

Our customers tell us four things make us different from other chemical suppliers.

- **EXPERTISE** – Experts to customize products for the unique chemical demands of our customers.
- **RESOURCES** – Analytical and technological capabilities to evaluate the best products to meet your needs.
- **RELIABILITY** – Consistent, dependable quality stemming from a corporate principle of operational excellence.
- **INNOVATION** – A diverse line of innovative products designed for performance and value creation.
